

ČEHAJIĆ HAMZA

Python Developer, Web Developer

Summary

Hello, my name is Hamza Čehajić. I am 22 years old and live in Sarajevo. My IT journey started at ITAcademy. After a one-year education and successful pass of the final exam, I obtained a Python Developer certificate.

After that, I enrolled in a one year education for JavaScript Frontend. I participated in an internship for an e-commerce site that was created using Python, Django and MYSQL technologies. I also obtained a WordPress Developer certificate on Udemy and published my first website.

For the last two years, I have been developing websites, improving them SEO and digital marketing

So far I have designed two web sites and one ecommerce project.

I like new experiences and I do well in the unknown. I am not afraid of working with technologies that are less familiar to me and I am always willing to learn and improve.
